

Celery

Utah Tall

Plant Seeds Indoors

| FEB | MAR | APR | MAY | JUN | JUL |
|-----|------|------|-----|-----|-----|
| | •••• | •••• | | | |

Ready to Harvest: 90–100 days

Start seeds indoors and transplant in mid-May or early-June. Celery is a heavy feeder. Water plants the day before harvest. Once mature, the stalks on the outside of the plant can be harvested at any time. Crisp stalks grow to 45 cm (18") tall and are excellent raw or cooked.
