

# Lovage

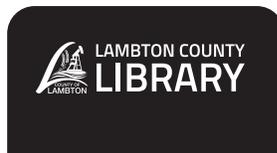

## Plant Seeds Indoors:

MAR	APR	MAY	JUN	JUL	AUG
...	.....				

**Ready to Harvest:** 90 days

Lovage is a hardy perennial herb with a celery-like taste. It has a long taproot, dies back in the fall, and re-grows in spring. You can start it indoors in spring or sow it directly in the fall. It grows 1.8–2.5 m (6–8') in a season and attracts beneficial insects with its flower heads. Handle with care, as the sap may cause skin irritation.
